

View What's Near You on the Map

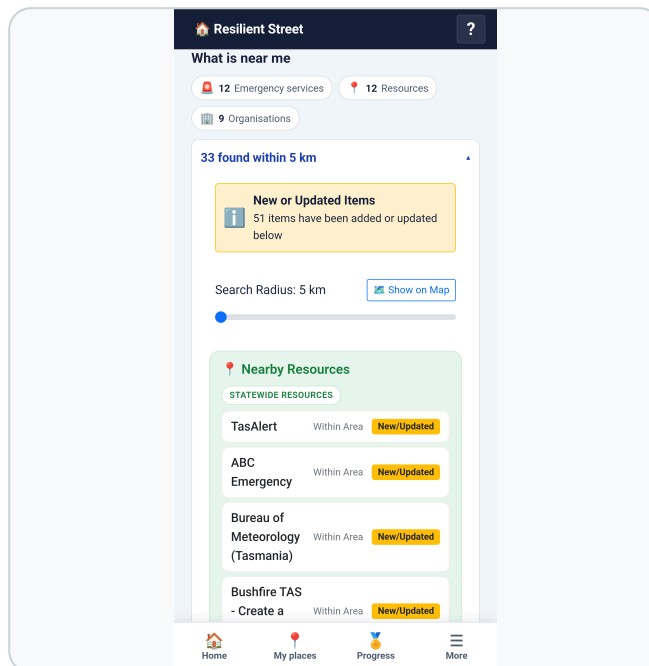

Explore community groups, nearby resources, organisations and emergency services around a place.

My places > select a place > What is near me

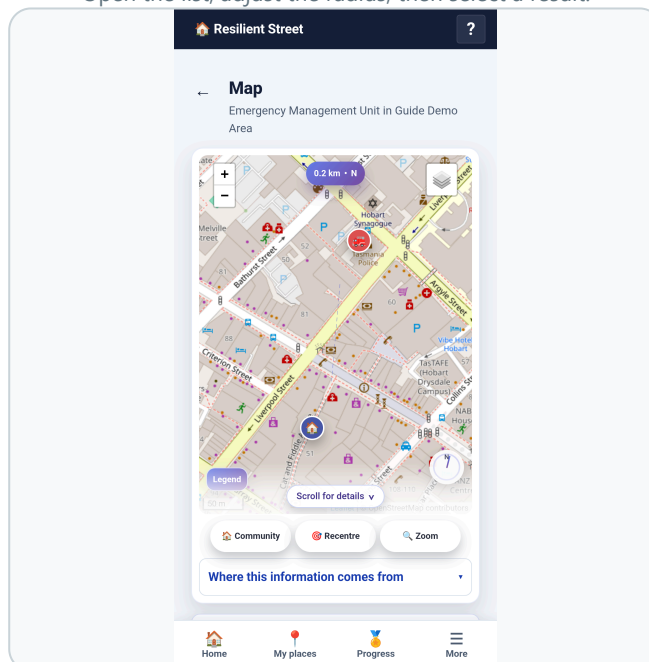

Find nearby information

1. Open the place you want to explore.
2. Scroll to **What is near me** to see counts, then tap the summary (for example *33 found within 5 km*) to open the list.
3. Drag **Search Radius** to search a wider or smaller area.
4. Browse the result categories and tap an item to open it on the map.
5. On the map, switch between **Community** and **Device** location, **Recentre** the view, or **Zoom** to the selected feature.
6. Scroll below the map for contact details, directions and links when available.

Location permission: Device mode needs location access. Community mode uses the location saved for the selected place.

Open the list, adjust the radius, then select a result.

Use the map controls and scroll for details.
